

Appendix to original instruction manual

Multipurpose hoe CHAMÄLEON

Assembly information for the combination of ASR / ARE rotary tiller and CHAMÄLEON multipurpose hoe in rear attachment

When mounting the rotary tiller at the rear, please note that the wheels of the tiller must be removed, as the distance to the tractor wheels is too small.

When setting the desired machine depth, observe the following sequence:

1. Depth adjustment of the CHAMÄLEON wheels via spindle

spindle

This setting also automatically controls the working depth of the tines.

2. Depth adjustment of the CHAMÄLEON discs via spindle

spindle

3. Setting the working depth on the rotary tiller
